

**DOES YOUR CHILD  
DISLIKE MAKING  
MISTAKES?**

**IS YOUR CHILD SHY,  
PERFECTIONISTIC,  
INFLEXIBLE, OR  
SELF-CRITICAL?**

**IS YOUR  
CHILD 4 TO  
7 YEARS  
OLD?**

**YOU AND YOUR CHILD MAY BE  
ELIGIBLE TO PARTICIPATE IN  
OUR STUDY!**

The Neurodevelopment of Overcontrol (NOA) Study is examining how perfectionism and high need for control develop in children.

Understanding these traits may help us prevent the onset of mental disorders and help kids live happier, healthier lives. Help us start the conversation about mental health!

## **THIS STUDY INCLUDES:**

- One study visit (4 hours) for parent & child now
- Two follow-up visits (3 hours) 1 year and 2 years later
- One online survey before each visit
- Receive up to \$125 at your initial session, \$100 at your first follow-up, and \$75 at your second follow-up + prizes (small kids' toys) for your child!

## **DURING EACH VISIT:**

- Activities, safe & non-invasive EEG for child, interviews, questionnaires
- Study procedures are provided at no cost to you
